CASE STUDY : Harsha Enterprises

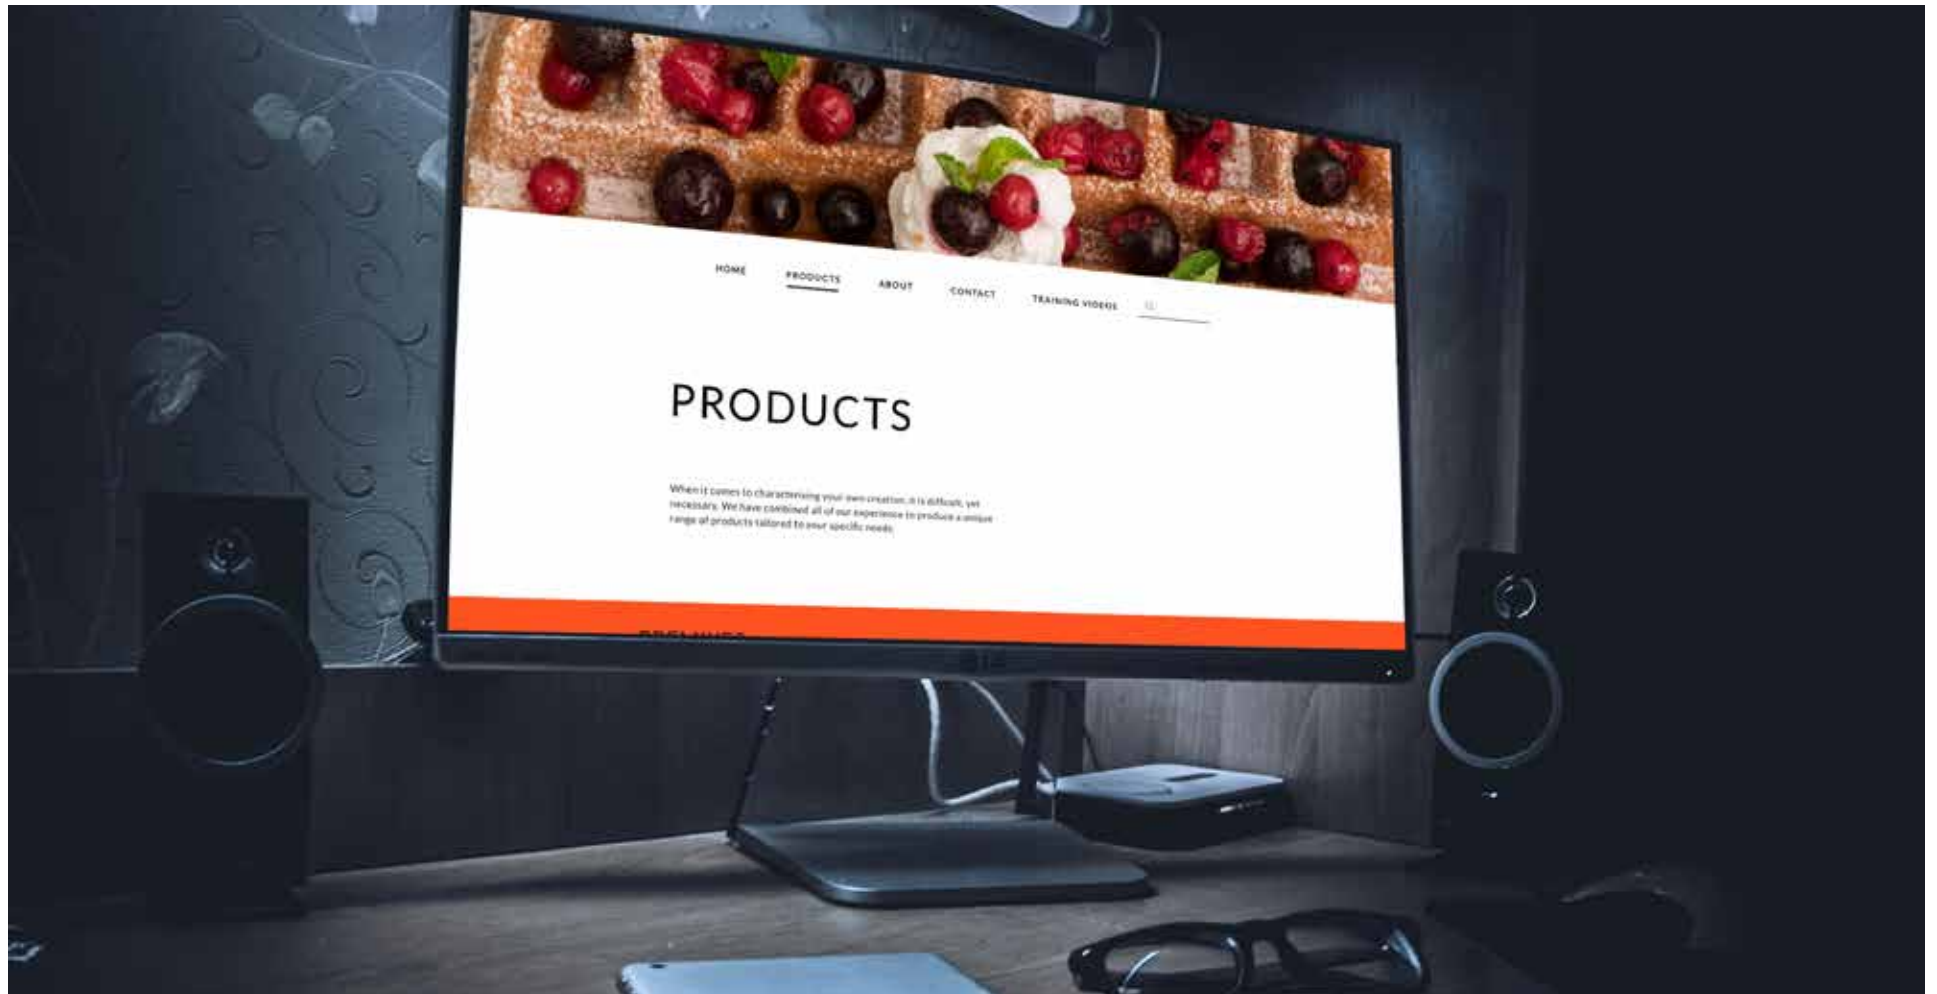

USER INTERFACE DESIGN & WEB DEVELOPMENT

Harsha Enterprises is a manufacturer of premix for Waffle cone and eggless premix of Belgian Waffle cones. The brief was to create a fast, lightweight and accessible site with a clear focus on content, both image based and copy.

iBRIDGE DIGITAL worked very closely with Harsha Enterprises team to bring their exciting new brand to the web for the first time. The brand needed to feel modern, well-connected and relevant whilst remaining inclusive and approachable, considering their broad and varied audience. With this in mind it was important that the user experience was completely intuitive and unchallenging, and consistent across a full range of device types.

The resulting website is one that's easy to navigate, easy to read and puts the user first at all times.

View the website at: www.harshaenterprises.co

CASE STUDY : Sadguru Interiors

IDENTITY DESIGN & BRANDING

Objective: Build a brand that will stand out and stand the test of time in the cutthroat market of interior designers.

Sadguru Interiors knew they needed a rock solid brand to launch their new company proper like, and they knew iBRIDGE DIGITAL had enough caffeine coursing through our collective arrhythmia plagued hearts to pull it off quick.

The founders had a unique and very specific vision for their brand. They wanted something simple, clean and classic while also new school and irreverent. Normally such a request would make us shake our heads in the no fashion, but we were enamored with their conviction and love a good challenge.

So we said “Let’s do it” Tone Loc style, rolled up our sleeves and got to work.

CASE STUDY : Toujours

CUSTOM CONTENT MANAGED APPLICATION

Objective: There is a lot of tradition but you also need a lot of inspiration, especially when it comes to food.
So we were asked to create an online home for cupcakes, chocolates etc. at Toujours.

SO MUCH TO DO AND NEVER HAVE ENOUGH TIME

So we made it easy to get food inspiration.

We created a Custom Content Managed website that was able to give the Toujours team complete control, filtering their products without having to fiddle around.

With over 200 different products, and accessibility from any device inspiration and cookies were never far away.

www.toujours.co.in

CASE STUDY : Sitaram Marbles

IDENTITY DESIGN & E-BROCHURE DEVELOPMENT

iBRIDGE DIGITAL was given a job of developing a full visual identity. Using high-quality paper, and complementary natural materials, it has managed to create a top-notch project. Beautiful patterns, quite neutral color palette, well-thought-out amount of white space and modular system create a fantastic experience with personality and charm.

CASE STUDY : Nikilime

RESPONSIVE WEBSITE

Objective: Creating a responsive website that delivers an experience and which also fits in the confines of a four-inch screen.

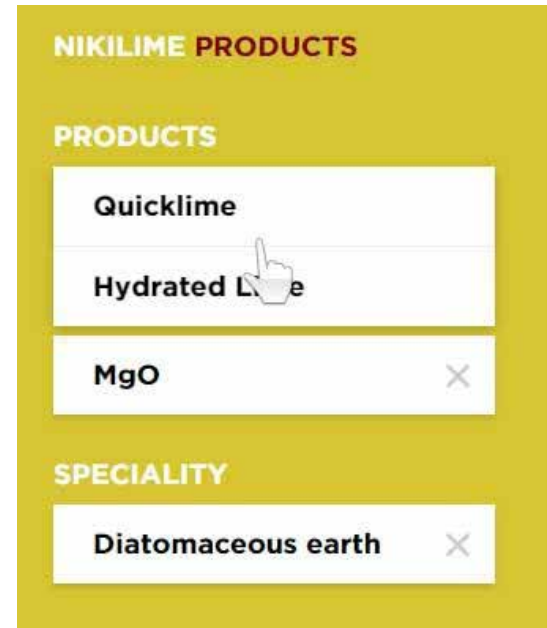

With the desktop version already pushing the boundaries of modern web practices, the process of translating everything to a small-screen experience was no small task. We boiled the full site down to only the most essential content while staying true to the design and UI elements necessary to communicate the overall concept.

View the website at: www.nikilime.com

UX / NAVIGATION

Because this site is so rich with content, it was imperative to build an intuitive, navigation system to guide users through it. We wanted the navigation to contribute greatly to the site's overall experience, and give users the freedom to explore the site as they choose rather than inhibit their movement from one section to another.

Hydrated Lin

THINKING DIGITAL

We design for humans.

Having a clear understanding of our users, their needs, behaviors, motivations, common touch points, the media and channels they are exposed to, is critical to our work.

Our thinking and methodology affects the way we look at problems and reach creative branding solutions.
